

## TOXIC REDUCTION PLAN SUMMARY

<b>Toxic Substance Information</b>		
Name of Substance	PM 2.5	
CAS # of Substance	N/A - 10	
<b>Facility Information</b>		
NPRI Identification Number	0000001169	
Company Name	Celestica International Inc.	
Facility Name	Celestica	
Facility Address	844 Don Mills Road Toronto, On M3C 1V7	
Number of Full-time Employees	1143	
Two Digit NAICS Code	33	
Four Digit NAICS Code	3341, 3342, 3359	
Six Digit NAICS Canada Code	334110, 334290, 335990	
UTM Spatial Coordinates (NAD83) for the facility	Latitude: 43.7219 Longitude: -79.3425 Datum: 1983	
<b>Parent Company (PC) Information</b>		
PC Legal Name	Celestica International Inc.	
PC Address, if different from the Company	Same address as facility	
Percentage Ownership for each PC	100%	
<b>Company Contact Information</b>		
Facility Public Contact	Tony McDermott Environmental Manager <a href="mailto:amcdermo@celestica.com">amcdermo@celestica.com</a> Phone: (416) 448-4904	Same address as facility

---

**Name of Toxic Substance for which plan have been prepared**

The Toxic Substance Reduction Plan has been prepared for one substance, Particulate Matter 2.5 (PM 2.5).

**Statement of Intent**

Celestica, a contract manufacturer, is committed to being a responsible neighbor in the communities in which we do business. The Toronto site is registered to ISO 14001 and a signed member of the Electronics Industry Citizenship Coalition (EICC) Code of Conduct. Wherever possible, and where practicable, we will eliminate or reduce the creation and discharge of Particulate Matter 2.5 (PM 2.5). We conduct our operations in compliance with applicable federal, provincial and municipal regulatory requirements. Celestica will continue to actively monitor technological developments that could assist in reduction of toxic substance usage. Where we determine that the developments are technologically and financially viable they will be considered for implementation.

PM 2.5 is mainly generated from natural gas combustion process which is used for steam production. In rare occasions where there is a shortage of natural gas fuel oil is used as an alternative energy source for steam production. A small amount of PM 2.5 is also generated from the manufacturing operations in which leaded solder products are being used.

**Reduction Plan Objectives**

Celestica already uses one of the most efficient and environmentally friendly natural resource to support their operations – natural gas. Although one reduction option was considered, it was determined not to be economically feasible so therefore Celestica will not reduce the level of PM 2.5 generation in the near future.

**Description of Substance**

As mentioned above, PM 2.5 is generated from natural gas combustion process. A small amount of PM 2.5 is also generated from the manufacturing operations in which leaded solder products are being used.

**Toxic Substance Reduction Option to be Implemented**

Although some reduction options were considered technically feasible, they were determined not to be economically feasible. As a result, there are no reduction options to be implemented at this time.

**PLAN SUMMARY STATEMENT**

This plan summary accurately reflects the content of the toxic substance reduction plan for **PM 2.5**, prepared on behalf of Celestica International Inc., dated December 20, 2012.

---

**CERTIFICATION BY HIGHEST RANKING EMPLOYEE**

As of December 20, 2013, I, John Cundari, certify that I have read the toxic substance reduction plan for the toxic substance referred to below and am familiar with its contents, and to my knowledge the plan is factually accurate and complies with the Toxics Reduction Act, 2009 and Ontario Regulation 455/09 (General) made under that Act.

Toxic Substance: Particulate Matter 2.5

---

**John Cundari**  
**VP Operations and General Manager**  
**Celestica International Inc.**

**CERTIFICATION BY LICENSED PLANNER**

As of December 20, 2013, I, Ailee Ho certify that I am familiar with the processes at Celestica International Inc. that use or create the toxic substance referred to below, that I agree with the estimates that are set out in the plan dated December 20, 2013 and that the plan complies with the Act and Ontario Regulation 455/09 (General) made under that Act.

Toxic Substance: Particulate Matter 2.5
