

Global Environmental Policy

At Celestica, we commit to:

- Being a responsible energy steward in the communities in which we operate.
- Continually improving our energy performance through programs focused on reduction in energy consumption and increases in energy efficiency.
- Practicing energy conservation and promoting energy savings in all areas of our business.
- Setting energy performance objectives and targets each year, based on previous results and trends and providing the necessary information and resources required to achieve the objectives and targets.
- Complying with applicable legislation and other requirements related to energy use, consumption and efficiency.
- Supporting the purchase, wherever possible, of energy-efficient products and services and assisting in the development and design for energy performance improvement.
