Andreea Simut	Sea & Air Operational Analyst	0040 359 403 836, int : 1436	fsimut@celestica.com

Multiple small packages shipped on the same day to Celestica must be consolidated into one shipment. The supplier is required to combine multiple part numbers and purchase orders in one shipping container/on one pallet/ once AWB/HAWB

Shipments of comparable size, height, and density that are difficult to handle, and for which the combined gross weight exceeds 150 pounds (68 kg) or are oversized should be palletized. Consolidate items shipped on one day to the same destination on one pallet, one bill of lading, one air waybill or ocean bill of lading. The Carrier to be used for same day consolidated shipment will be based on the weight breaks listed below

All Palletized Air Freight Shipments require Celestica Site approval prior to booking with Carriers listed below

Below is the standard freight routings. Please coordinate (max of dimm weight and actual weight) when determining An explanation and examples on how to calculate your

International Commercial Invoice Requirements

All Commercial invoices must contain the following information.

- | | |
|---|--|
| 1. Shipper name and address | 10. Description |
| 2. Sold to or Invoice to name and address | 11. Quantity (for each line item) |
| 3. Ship to name and address | 12. Unit price (for each line item) |
| 4. Invoice number | 13. Extended price (for each line item) |
| 5. Ship date | 14. Country of origin (for each line item) |
| 6. Carrier and way bill number (if info. available) | 15. Total value on the invoice |
| 7. Incoterms | 16. Weight and number boxes or skids. |
| 8. PO number | 17. Harmonized Tariff Schedule (HTS) and Export Control Classification Number (ECCN) |
| 9. Celestica part number | |

Status Authorized Economic Operator (AEO)

Dear Sir/Madam,

As a result of increasing globalization and international security concerns, the World Customs Organization The European Union put these WCO requirements into European Law and added them to the appropriate Companies that are located in the European Union and that are involved in customs activities can apply for AEO The AEO program has been implemented in non-EU countries. AEO-like programs also exist (e.g., Customs-Celestica Romania is AEO Customs Simplification / Safety certificate (AEO-F) certified. A requirement of the Please advise if your company has been awarded an AEO certificate (AEO-S or AEO-F). If so, please e-mail us

Please send the documents to the following e-mail address:

clpacura@celestica.com

We would like to point out that the security requirements of AEO will be part of the General Terms and Conditions of Celestica Romania.

If you have any questions about AEO please contact your local customs authority. Otherwise, you may contact the following contact person at Celestica Romania:

Corina Albut
Site Trade compliance Officer
Celestica Romania

Weight Definitions and Calculations

- The weight of a package using a standard scale rounded to the next full pound / KG. (Example: a 12

Dimensional (Volumetric) Weight:

- A calculation used to reflect a package's density.

The International Air Transport Association (IATA)

Chargeable weight:

- The chargeable weight of the shipment will be the higher of the volumetric weight or the gross weight.

How to Calculate Volumetric Weight (International air shipments)

International Shipments Calculation with Freight Forwarders (CEVA, Panalpina and DHL Express)

Imperial (IN / LBS)

DIMENSIONAL WEIGHT = $\frac{\text{Length} \times \text{Width} \times \text{Height} = \text{Cubic Inches}}{166 \text{ (International)}}$

Metric (CM / KG)

DIMENSIONAL WEIGHT = $\frac{\text{Length} \times \text{Width} \times \text{Height} = \text{Cubic Centimetres}}{6000 \text{ (International)}}$

International Shipments Calculation with TNT Express and FedEx Express

Metric (CM / KG)

DIMENSIONAL WEIGHT = $\frac{\text{Length} \times \text{Width} \times \text{Height} = \text{Cubic Centimetres}}{5000 \text{ (International)}}$

International Shipments Calculation with DHL Freight and TNT Economy

Metric (CM / KG)

DIMENSIONAL WEIGHT = $\frac{\text{Length} \times \text{Width} \times \text{Height} = \text{Cubic Centimetres}}{4000 \text{ (International)}}$

Identifying what your chargeable weight will be:

Example - Imperial Calculation

Actual Pallet Weight = 250lbs

Pallet Dimensions = 48 x 40 x 50in

Pallet Volumetric weight = $(48 \times 40 \times 50) / 139 = 690.65\text{lbs}$

Chargeable Weight of shipment = 691lbs

Example - Metric Calculation

Actual Pallet Weight = 150kg

Pallet Dimensions = 122cm x 102cm x 120cm

Pallet Volumetric weight = $(122 \times 102 \times 120) / 5000 = 298.66\text{kg}$

Chargeable Weight of shipment = 299kg

How to Calculate Volumetric Weight (USA Domestic air shipments)

Imperial (IN / LBS)

DIMENSIONAL WEIGHT = $\frac{\text{Length} \times \text{Width} \times \text{Height} = \text{Cubic Inches}}{166 \text{ (USA Domestic)}}$

Example - Imperial Calculation

Actual Pallet Weight = 250lbs

Pallet Dimensions = 48 x 40 x 50in

Pallet Volumetric weight = $(48 \times 40 \times 50) / 166 = 578.31\text{lbs}$

Chargeable Weight of shipment = 578.5lbs

or

Example - Imperial Calculation

Actual Pallet Weight = 600lbs

Pallet Dimensions = 48 x 40 x 50in

Pallet Volumetric weight = $(48 \times 40 \times 50) / 166 = 578.31\text{lbs}$

Chargeable Weight of shipment = 600lbs

Length or Girth - (For Domestic USA and International shipments with FedEx, Air and Ground)

Your Chargeable Weight will be based on the greater between the actual package weight and the Length and Girth of the package.

Length - is the largest dimension of the carton or object being shipped. For example, if the package is very tall (height is greater than the base) use the height as the length.

Girth - is the sum of 2 times the width plus 2 times the height or the measurement around the largest area of the cylinder (see illustration).
