

Powering Innovation Through Open Platforms

Celestica's Platform Solutions

Celestica™

Celestica's mission is to enable the world's best businesses to turn their vision into reality. We build trusted relationships and solve complex technology challenges to help our customers realize greater value, potential and outcomes.

Powering the Open Source Community

At Celestica, we believe that embracing the open community fosters interoperability, increases flexibility and fuels innovation. As a long-standing member of the open source community, with OCP Inspired™ and OCP Accepted™ contributions and a robust portfolio of open networking and software solutions, Celestica is committed to powering tomorrow's open innovations, today.

Celestica is ready to help you develop tomorrow's leading technologies, today.

We are future-focused

With strong technology ecosystem partnerships, a collaborative design approach, and market-driven product solutions, we're at the forefront of next-gen technology – providing you with a distinct competitive edge.

We unlock differentiated value-added solutions

As your complete technology partner, our innovative solutions and depth of experience enable you to streamline every aspect of product realization – so you can efficiently deploy the highest quality products, while decreasing complexity and cost.

We share your vision for a more sustainable world

At Celestica, sustainability is at the core of what we do. We optimize sustainability at every stage of the product lifecycle – extending product lifespan through green design and manufacturing, responsible IT asset management and disposal.

We accelerate technology

We've invested in developing a leading-edge portfolio of platform solutions and a global network of regionalized locations to help you navigate technology challenges and market dynamics quickly – enhancing your innovation, agility and resiliency.

Celestica's Platform Solutions Portfolio

Delivering comprehensive, customizable support for your Enterprise and Data Center needs

ENTERPRISE ACCESS SWITCHES

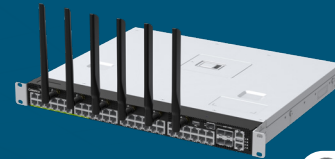

Enabling connectivity, scalability and security at the enterprise edge

NEW

ES1500

1U 8 / 24 / 48-port 2.5GbE (PoE) Campus Access Switch

EG1050

1U 48-port 1GbE / 2.5GbE (PoE) Edge Gateway with Wi-Fi and 5G

ES1010 / ES1050

1U 48-port 1GbE / 2.5GbE (PoE) Access Switches

ES1000

1U 24 / 48-port 1GbE (PoE) Access Switch

NEW 800G FAMILY OF NETWORKING SWITCHES

Propelling AI and ML connectivity with unprecedented speed and agility

NOW SHIPPING!

DS5000

2U 64-port 800GbE Data Center Switch

DS4101

1U 32-port 800G Data Center Switch

NOW SHIPPING!

DS4100

1U 16-port 800G Data Center Switch

HIGH-PERFORMANCE SWITCHES

Performance, flexibility and efficiency to fit your unique applications

DS4000 / DS4001

1U 32-port 400GbE Data Center Switch

DS3001

2U 64-Port 100GbE Data Center Switch

DS3000

1U 32-port 100GbE Data Center Switch

SCALABLE, TOP-OF-RACK SWITCHES

Open infrastructure platforms for
future-ready data centers

NOW SHIPPING!

DS1000
1U 48-port 1GbE
Data Center Switch

DS2000
1U 48-port 10GbE / 25GbE
Data Center Switch

STORAGE

High-performance expandable storage, ideal for large scale-out environments

CONTROLLERS

Next-generation controllers delivering
performance and high availability

NOW SHIPPING!

SC6100
2U 24 SSD High Availability All-Flash PCIe®
Gen 5 Storage Controller

SC4200
2U 24 SSD High Availability NVMe All-Flash
PCIe® Gen 4 Storage Controller

STORAGE EXPANSION

Delivering performance, efficiency
and reliability without compromise

SD6200
4U 90 HDD Dense Storage
SAS-4 Expansion System

NEW

SD4100
2U 12 HDD SAS-4 Storage
Expansion System

Powering High-Performance Solutions

High-performance computing (HPC) and artificial intelligence (AI) are driving forces in the ongoing evolution of technology across various sectors. The growing need for greater bandwidth and lower latency is fueling rapid innovation. Celestica is at the forefront of this transformation, offering advanced Platform Solutions, designed to meet the demanding requirements of enterprises, data centers and cloud computing environments.

Celestica has extensive expertise in developing comprehensive solutions, including our roadmapped range of rack servers, storage arrays, and ethernet switch products, as well as collaborative joint development, custom design, and manufacturing services. Our dedicated engineering and customer teams take pride in delivering end-to-end services with the highest quality and meticulous attention to every aspect of each solution.

We Take An Open Approach to Software

Avoid vendor lock-in and reduce the cost of software and support services, with an open, flexible approach to software. Celestica delivers network solutions at scale through open SONiC NOS.

Partnering with industry-leading companies and consortiums we deliver value through our:

- Systems and solutions partners - Open, leading-edge management and monitoring
- Technology partners - Best-in-class technology components
- Industry consortiums - Member-driven leadership to advance industry protocols
- Distribution partners - Value-added partnerships for tailored solutions and services

Celestica Support for SONiC

While SONiC runs across network components from many vendors, choosing the right vendor is still an important decision, because universal support doesn't mean equivalent benefits.

Hardened Version

The community version of SONiC from Celestica includes advanced hardening features to boost reliability and availability.

Celestica Strengthens Community SONiC

As a member of the Linux Foundation and associated working groups, new features, innovations, and fixes made by Celestica are shared with the community.

Support Contracts Available for Purchase

Celestica can provide additional support to customers that require it.

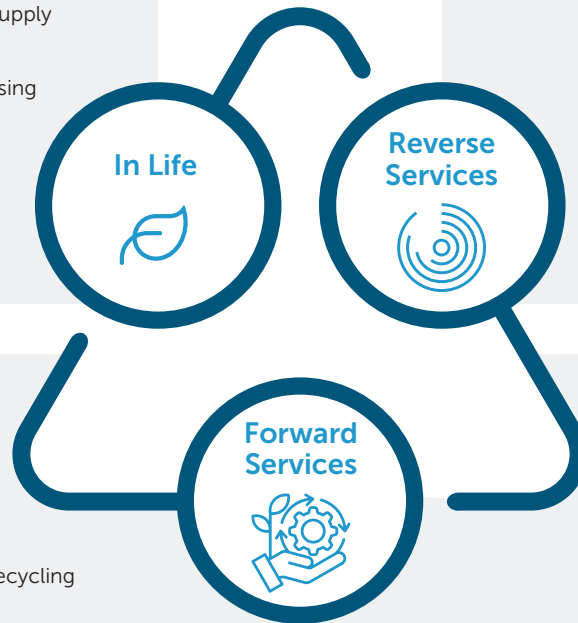

Custom Features Can Be Added on Request

Celestica can develop and integrate unique new features needed by customers.

Explore Celestica's Circular Services

Delivering lifecycle solutions at every phase of product life

- 24/7 call center support services
- Installation / De-installation
- Advanced Exchange Program (parts management, forward stocking and supply chain replenishment)
- Inventory management and warehousing
- Certified repair and refurbishment
- Redeployment and re-kitting
- Supply chain decarbonization
- Third party maintenance (TPM)

- Advanced configure to order (CTO) remanufacturing and product design
- Hardware and software upgrades
- Redeployment within your organization
- Return material authorization (RMA) management and warranty validation
- Customizable third-party maintenance and extended warranty

- Data erasure and media destruction
- Asset recovery, onsite services, parts harvesting and IP / material reclamation
- R2 / e-Stewards compliant e-Waste recycling
- Redeployment order fulfillment

- Lease return, OEM trade-in and hardware takeback
- Global remarketing for excess and obsolete (E&O) equipment, parts and components
- Facility shutdown and migration services

Services and Support Offering

Celestica's technical support services are available for purchase. We are here to help our customers maintain their Celestica solutions and resolve technical issues that may arise. We are dedicated to providing our customers with the resources needed to succeed.

Our Customer Experience (CX) engineers manage your support case from beginning to end, ensuring issue resolution to your satisfaction.

Celestica Care includes:

- Knowledge Base Access
- Monday through Friday 8 am – 5 pm local access to technical support, excluding holidays
- Hardware and software troubleshooting
- Online ticket creation and tracking
- Firmware updates
- Access to software releases

Celestica Care Plus includes all the features of Celestica Care in addition to the following:

- 24/7/365 Global access to technical support
- Defined response time service level agreement (SLA)
- Escalation Matrix - Management notification for critical and high-priority instances

In addition, we also offer an Advanced Exchange Program (AEP) that can be purchased separately for Celestica Care and Celestica Care Plus.
