

CELESTICA MAINTENANCE, REPAIR & OVERHAUL

Unlock Potential in Your Business

With Celestica, the sky's the limit.

For over 15 years, Celestica has been a trusted partner to the world's top Aerospace and Defense (A&D) companies. We provide customers with end-to-end product lifecycle solutions with capabilities ranging from design and value engineering to production, testing and after-market support.

Our maintenance, repair & overhaul (MRO) services allow you to:

Drive efficiencies and quicker turnaround time (TAT)

Enable growth by freeing up personnel in your existing infrastructure

Increase margins without transferring costs to your customer

Proven Industry Leader. Proven Approach.

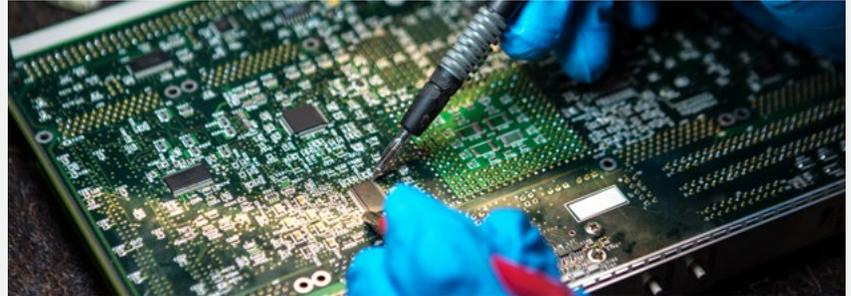

Trusted product lifecycle solutions for high-reliability electronics applications found in almost every aircraft in flight today

Long-term relationships with hundreds of component suppliers worldwide

Deep industry knowledge backed by a highly experienced team - from executive leadership to our global network of employees

Exceptional MRO Services Tailored To Your Unique Needs

Celestica works in close partnership with our customers to deliver the most innovative and cost effective product lifecycle solutions. Through our Lifecycle Solutions Management (LCSM) process, we provide customers with strategic alternatives for long term product maintenance. Our focus on quality, reliability and regulatory compliance ensures strict adherence to the most stringent standards.

Our MRO Experience

Over 100 different part numbers including:
Electrical Systems • Avionics Systems
Sensor Systems • Electromechanical

Complete Product Lifecycle Solutions

As an \$8B global company, we provide customers with end-to-end product lifecycle solutions—design and engineering, production, testing, obsolescence management and after-sales support.

Design & Engineering

Supply Chain Services

New Product Introduction

Printed Circuit Board Assembly

Box Build/ LRU Build/ System Integration

Maintenance, Repair & Overhaul

Obsolescence Management

Our Capabilities

- Obsolescence Management
- Level 2 and Level 3 Repairs
- Repair, Test & Overhaul
- Final Test, Assembly and Integration
- Spares Pool
- Complex Assembly
- Worldwide Customer Support Network
- Test Equipment Design, Integration and Support
- Integrated Process Manufacturing
- Environmental Stress Screening

Celestica Test Services

At Celestica, we enable your success every step of the way by working as a seamless extension of your team, supporting you in addressing the product lifecycle from start to finish.

Our in-house dedicated test development team is ready to work along side you in providing project management and consulting support, test services solutions with exact specifications for design and manufacturing requirements or assist you in managing your existing test equipment.

Engineering Leadership

Single source solution enabling your success every step of the way.

3,000
Engineers
worldwide

Leader
in the development of
industry standards for
test solutions

and manufacturing
process patents

Celestica Licensing Services

Eliminate the burden of mature product lines

Our Licensing Services will help eliminate your need to provide product support, inventory, and capital equipment expenses for mature products lines while still providing your business with a steady royalty revenue stream.

Celestica's Lifecycle Solutions Management (LCSM) process will allow us to identify and manage obsolescence and redesign requirements for your customers. As a trusted leader in Aerospace & Defense, Celestica will ensure long-term product continuity without ever compromising quality or reliability, allowing you to focus on driving innovation for your business.

Celestica Licensing Services can help you win:

Accelerate Financial Growth

- Minimize product support costs for legacy products
- Reduce slow-moving inventory and capital expenditures
- Sustain profits from ongoing payments

Reach Further With Our State-of-the-Art Network

- Our A&D business flows through our certified Centers of Excellence across the globe
- Worldwide support capabilities to support aircraft on ground (AOG)

Strengthen Customer Relationships

- Provide ongoing, experienced customer support for mature products lines
- Retain and protect your IP

Drive Innovation Forward

- Free up personnel to focus on new technologies that drive business objectives
- Fund future growth opportunities through quick cash injection and royalties

Global A&D Network Providing Quicker Turnaround Time

- Certified Centers of Excellence network across the globe with an established supply chain
- Operations in low-cost geographies to drive cost efficiencies
- Specialized ability to design and build test equipment in support of aircraft electrical and avionics line-replaceable units (LRUs)
- Embedded repair services organization with 1,000+ employees dedicated to R&O
- Ability to leverage our worldwide integrated logistics services to move parts around the world – quickly and effectively
- Significant investments in our MRO facilities, including updates towards a connected factory

Aerospace & Defense Centers of Excellence (COE) Network
